

- Create a basic component that displays "Hello, React!" on the web page.

```
import { useState } from 'react'
import reactLogo from './assets/react.svg'
import viteLogo from '/vite.svg'
import './App.css'
```

```
function App() {
  const [count, setCount] = useState(0)

  return (
    <>
      <h1>"Hello, React!"</h1>
    </>
  )
}

export default App
```

"Hello, React!"
